साफ-सुथरा देश हमारा

आजो मिलकर हमारे देश को बनाएँ साफ-सुथरा  
तो ही हमारे पैड़-पौधों को नही होगा कोई खतरा

आजो सब मिलकर निकाले कोई ऐसा उपाय  
कैसे पैड़ों को बचाएँ उसका सौल्युशन  
मत करो ग्लोबल वॉर्मिंग और पील्युशन

हम सब मिलकर एक-दूसरे का हाथ बटाएँ,  
अपने देश को साफ-सुथरा और सुंदर बनाएँ।

जर्जी पान, कक्षा-पाँचवीं

A Beautiful Dream

I was walking in a evening night  
With a beautiful and thoughtful mind.

I left the life behind  
Because life left me

I was walking and  
A sweet wind stops me

I closed my eyes delightfully  
And when I opened my eyes

I saw a girl coming towards me

She came closer to me  
And whisper in my ear.

"Life is too short , don't waste it dear"

And suddenly I opened my eyes  
And I realise, it is a  
Dream with a beautiful meaning.

## Art and Spirituality: Srimanta Sankardeva's Endeavour and Contributions

The term 'art' denotes various creative activities through which an artist expresses his imagination and creates a relationship between the viewer and the art. Art is a core part of our society which displays our history in a very different language. Formerly the subjects of the artworks focus on constantly myths, legends and stories from religious accounts, to show how the spirituality and the holy power to make a wisely person/s for a virtuous social order in his or her good life and existence, and also trying to persuade disciples to accept that the truth is always with god through faith and devoutness. As days past, the definition and function of art get changed.

According to Danto art cannot stand alone as an artwork. It needs a related artistic content and a historical narrative which can support it. He always emphasis on the universal concept, which unifies the art work.

Srimanta Sankardeva (1449-1568) was a stalwart being who changes the cultural scenario of Assam during his lifetime in the medieval period. He was a great scholar, a saint who is brilliant in almost all the human related issues and problems of existence. He was a prolific writer too. His writing includes plays, epic stories, hymns, songs, philosophical treatise etc. His creation *Kaliya damana* (ankiya play) became very prominent, since from the earlier period in the history of bengali culture in India is named after *Kaliya Damana*, the religious myth, which was one of the popular subject, led and propelled the *Yatra* movement in Bengal from sixteenth century onwards. Being a saint Sriminanta always believed in metaphysical fantasy of god which talks about the absoluteness and which can obtained only by gathering knowledge. Here his concept relates with Danto where his piece of art got inspiration from his spiritual knowledge and was supported by the historical values of Vaishnavism. He disseminated his knowledge to the people through the process of teaching, performing arts, music, and play. For which he established *namghar;s* and *satray;s* which become the centre of spirituality as well as art-culture, literature and education of public. His main objective was to reform the society from ignorance, violence, oppression, exploitation and vandalism in the name of spiritualism. To make people feel the spiritualism he creates his plays and his intension was to make his people feel *Santa rasa* which gives the spiritual bliss, and that pure feeling which hard to describe in words, but it is something very calm and super natural. To make the spectator feel the spirituality rather than emotional, he used masks on the face of the actors in his plays decisively. The subjects of his plays are religious through which he spread his religious thoughts.

## ARTICLES ABOUT THE CAUSES AND PREVENTION OF MATHEMATICS ANXIETY IN PRIMARY CHILDREN

Mathematics anxiety has been defined as feelings of tension and anxiety that interfere with the manipulation of numbers and the solving of mathematical problems in a wide variety of ordinary life and academic life. Mathematics anxiety can cause phobia on mathematics that can break one's self confidence.

In primary classes, children have fresh mind and fresh thoughts but to the subject concern most of the child has anxiety about mathematics. Behind, anxieties there are many causes-

- i) Individual differences.
- ii) Shyness.
- iii) Misconception -like boys are always good in mathematics unlike girls.
- iv) Classroom environment and teacher's negative attitude.
- v) Frequent absent in school.
- vi) Lack of proper interest towards mathematics.

Mathematics anxiety is not permanent it can be prevent anytime if someone is interested to do and it is important to overcome for many aspects. There are some prevention tips for primary classes-

- i) Parents and teacher should encourage the child to know about practical use of mathematics like daily basis work, marketing and so on.
- ii) Create space for child to share their opinion in mathematics class.
- iii) The child should follow the process of mathematics rather than result.

Lastly, I want to conclude the above that mathematics anxiety is not a disorder, it may be a problem and we know that every problem has many solutions.

Self composed poem by Mrs. Aloka Chakraborty

Blessing of God

Oh ! almighty you are a

Great artist.

Colourful flowers shake their -

Petals yes, yes.

A gentle breeze,

Touches my hair.

A bird chirps.

A flock of bird's flying-

In the blue shining sky.

Brown dry leaves -

Threw their old leaves.

Shining with green soft leaves.

The wind is playing with them.

Squirrels are busy.

Running here and there.

Every moment I feel,

You are great.

Oh! Creator

Every moment, I feel

Your greatness

Your blessings.
